

Reading Technologies, Inc.

*Advanced Air System Technology™*

# Why RTi?

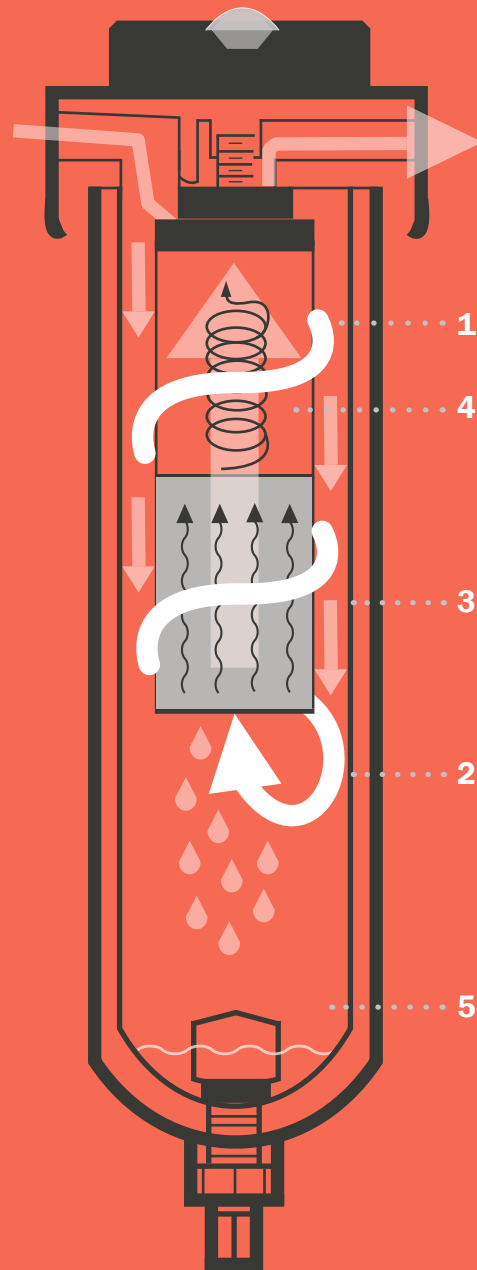

## Superior Engineering. Unique Inverse-Flow™ Filter Technology.

Let's take a look at  
RTi's efficient  
and reliable approach:

- 1 Centrifugal Spinning**  
Water, dirt, & oil contaminants are spun in a downward circular motion through the air. The spinning action forces heavy particles outward—towards the drain.
- 2 Inverse-Flow™**  
RTi's Inverse-Flow™ process creates a condition where the air, spinning in a downward circular motion, changes direction 180° and begins to flow vertically upward. Contaminants are not capable of reversing direction & must separate from the air flow. This process prevents re-entrainment of contamination, which can occur in other filter systems.
- 3 Stainless Steel Element**  
Pre-cleaned air enters a filter media composed of finely interwoven stainless steel mesh wires. The striated surface efficiently holds aerosols and liquid droplets, which then fall into the drain area. Filtration to 3.0 micron.
- 4 Final Filter Media**  
Composed of interwoven cotton, polyester and stainless steel. Filter captures excess sub-micron water droplets. Cotton holds the water particles & allows them to re-enter the air stream as harmless vapor. Filtration to 1.0 micron.
- 5 Bowl & Drain Options**  
Bowls—metal or polycarbonate bowl with metal guard.  
Drains—automatic float, manual, or electronic options.

**Reading Technologies, Inc.** has been at the forefront of **advanced air system technology** since 1986. Our innovations include compressor room desiccant & refrigerated dryers, main line separators/coalescers, point-of-use dryers, and filter, regulator and lubricator units.

The RTi brand prides itself with providing **clean, dry air**. Have specific requests? We build around your custom needs. Call us to find out more: (800) 521-9200

RTi's filter lines are 100% made in the U.S.A.  
All other products are made in the U.S.A. of U.S. and imported parts.  
RTi products are protected by U.S. and international patents/patents pending.  
Eliminex®, Elimimizer®, & Eliminator® are registered trademarks of RTi.

### Eliminex®

*Description:* RTi patented inverse flow filter-dryer with all stainless steel mesh filter packing, excellent water & dirt capture to 3 microns. ISO Class 3 Particulate.

*Port Size Range:* ½" NPT to 6" ASA (150#) Flange

*Flow Range:* 60 scfm to 5500 scfm @ 100 PSI

*Applications:* Generally used in main lines and in heavy duty service where heavy water removal is needed. Also good for outdoor service where freezing temperatures can be encountered.

### Eliminex® Combo

*Description:* (2) stage assembly which combines an Eliminex® (separator/filter) with a high efficiency Coalescer to give superior oil & fine particulate capture, in addition to heavy water removal. 99.99998% efficient at 0.01 micron. ISO Class 1 Particulate/Oil.

*Port Size Range:* ½" NPT to 6" ASA (150#) Flange

*Flow Range:* 60 scfm to 3000 scfm @ 100 PSI

*Applications:* Generally used in main lines and in heavy duty service where heavy water, dirt & oil removal is needed.

### Eliminizer®

*Description:* RTi patented inverse flow filter-dryer with (2) stage filter packing: stainless steel mesh & cotton/polyester. Excellent water & dirt capture to 1 micron. ISO Class 2 Particulate.

*Port Size Range:* ¼" NPT to 1" NPT

*Flow Range:* 20 scfm to 150 scfm @ 100 PSI

*Applications:* Generally used at point of use and in heavy duty service where heavy water & dirt removal is needed.

### Eliminizer® Combo

*Description:* (2) stage assembly which combines an Eliminizer® (filter-dryer) with a high efficiency Coalescer to give superior oil & fine particulate capture, in addition to heavy water removal. 99.99998% efficient at 0.01 micron. ISO Class 1 Particulate/Oil.

*Port Size Range:* ¼" NPT to 1" NPT

*Flow Range:* 20 scfm to 150 scfm @ 100 PSI

*Applications:* Generally used at point of use and in heavy duty service where heavy water, dirt & oil removal is needed.

### Coalescer

*Description:* High efficiency coalescer, 99.99998% efficient at 0.01 micron, with anti-re-entrainment layer for low oil carryover. ISO Class 1 Particulate/Oil.

*Port Size Range:* ¼" NPT to 6" ASA (150#) Flange

*Flow Range:* 20 scfm to 3000 scfm @ 100 PSI

*Applications:* Generally used in mainlines or at point of use, where oil and/or fine particulate capture is required.

### Oil Extractor®

*Description:* RTi patented inverse flow filter-dryer with (4) stage filter packing, including an activated carbon packing backed by a cotton/polyester packing. Excellent water, dirt & oil aerosol capture to 1 micron. ISO Class 1 Particulate/Oil.

*Port Size Range:* ¼" NPT to 1" NPT

*Flow Range:* 60 scfm to 150 scfm @ 100 PSI

*Applications:* Generally used at point of use and in heavy duty service where heavy water, dirt & oil removal is needed. Can be used in combination with a coalescer (see below) to get a higher efficiency filtration (to 0.01 micron).

### Oil Extractor® Combo

*Description:* (2) stage assembly which combines an Oil Extractor® with a high efficiency Coalescer to give the best oil & fine particulate capture, in addition to heavy water removal. 99.99998% efficient at 0.01 micron and to 0.003 ppm. ISO Class 1 Particulate/Oil.

*Port Size Range:* ¼" NPT to 1" ASA (150#) Flange

*Flow Range:* 60 scfm to 150 scfm @ 100 PSI

*Applications:* Generally used at point of use where heavy water, dirt, oil & oil aerosol removal is needed.

# Choosing the Right Filter: By Contaminant

*Determine the right filter, and the page you can find it on in this guide – organized by contaminant/filtration capacity.*

	System	Filtration/ Dew Point	Contamination					Page
			Moisture		Particulate (Dirt)	Oil	Odor	
			Water	Dew Point Suppression

## The Compressed Air Quality Standard: ISO 8573.1

We follow air quality standards as defined by ISO — the International Standards Organization. These internationally recognized standards for air quality and product design categorize our products into different ISO Classes by contaminant type ( water, dirt, oil) & air quality levels.

Class	Solid Particulates (Dirt) (maximum number of particles per m <sup>3</sup> )			Water Pressure Dewpoint (°F)	Oil Solids & Vapor (mg/m <sup>3</sup> )
	0.1-0.5 micron	0.5-1.0 micron	1.0-5.0 micron		
1	100	1	0	-94.0	0.01
2	100,000	1,000	10	-40.0	0.1
3		10,000	500	-4.0	1.0
4			1,000	37.4	5.0

see Product Pages for ISO Classes

## Why should I care about the quality of my compressed air?

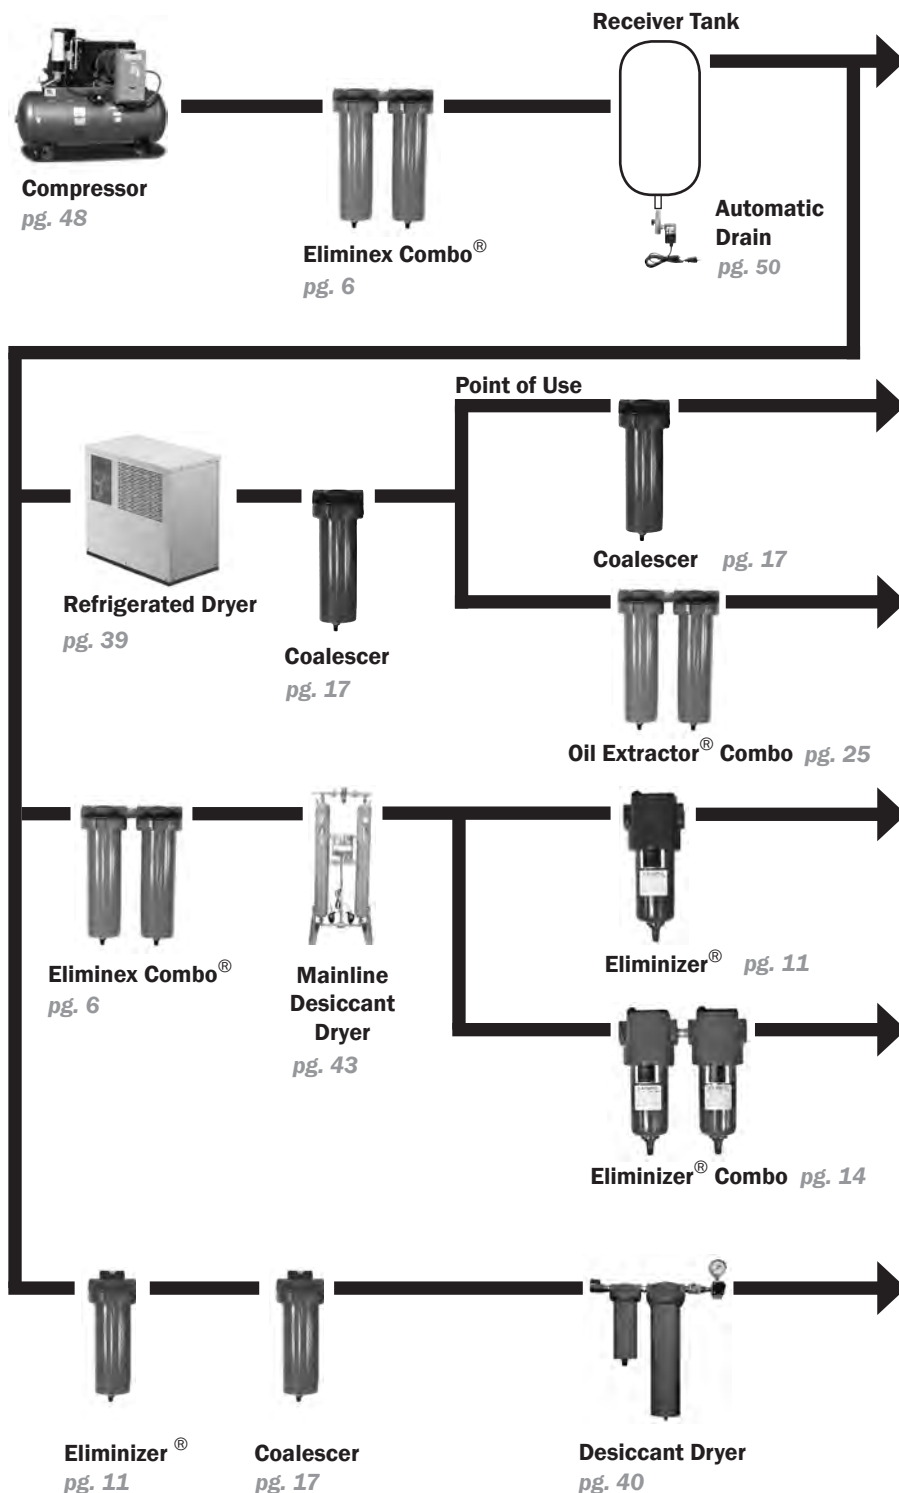

Clean, dry air is important—whatever the application may be. In air powered production systems, components are affected by contamination:

Device	Effects		
	Water (Moisture)	Particulate	Oil
<b>Piping</b>	rust & scale	component failure	component failure
<b>Air Cylinders</b>	reduced component life lubricant wash-out component failure	poor sealing of piston rod reduced service life	reduced component life
<b>Air Valves</b>	sticking spools coil failure lubricant wash-out	seal failure clogged mufflers	reduced component life swollen seals valve failure
<b>Pneumatic Positioners</b>	IP & EP failure valve failure positioning problems	clogged orifices equipment malfunction	seal failure
<b>Spraying Equipment</b>	poor curing loss of gloss poor color match	increased cutting & buffing	fish eyes poor quality finish
<b>Air Tools</b>	internal corrosion lubricant wash-out	internal wear seal failure	swollen seals
<b>Air Motors Air Bearings</b>	catastrophic failure reduced efficiency	clogged orifices reduced efficiency	inaccurate measurements instrumentation error
<b>Laser Cutters Plasma Cutters</b>	tip failure poor surface finish	clogged orifices	tip failure mirror coating

# Which system is right for you?

Compressed air systems can be designed to meet customer requirements. RTi can assist in your specification process to determine the most cost-effective, practical design for your individual applications. Be sure to view the corresponding page numbers for more information on these products.

Pressure Dewpoint	Filtration Capacity		
	Solid Particles	Oil Aerosols	Oil Vapors
90°F to 110°F	0.01 micron & larger	99.9%+	N.R.*
38°F to 50°F	0.01 micron & larger	99.9%+	N.R.
38°F to 50°F	0.01 micron & larger	99.9%+	Filtered with Activated Carbon to 0.003 ppm
-40°F to -100°F	1.0 micron & larger	99.9%+	N.R.

## Replacement Parts & Accessories

Description	Part Number
<b>A</b> Replacement Element, 1st stage	DE301/DE350/DE401
<b>B</b> O-ring: for DE350-P02/P04 & DE301-M04	N32-95-256
<b>B</b> O-ring: for DE401-M04	N32-95-257
<b>C</b> Bowl Assy: for DE301-M04 (Bowl, Drain, O-ring)	N34-95-201
<b>C</b> Bowl Assy: for DE350-P02/P04 (Bowl, Drain, O-ring)*	N32-15-167
<b>C</b> Bowl Assy: for DE401-M04 (Bowl, Drain, O-ring)	N34-15-180
<b>D</b> Manual Brass Petcock Drain:for DE350-P02/P04	N32-95-182
<b>D</b> Petcock Drain: for DE301-M04	PC-02
<b>D</b> Petcock Drain: for DE401-M04	PC-03
Sight Glass Assy: for DE401-M04	RTI-SG-651

\*Poly bowls come with metal bowl guard

Replacement Parts & Accessories:  
 Letters on the part breakdown correspond to the adjacent chart for easy reference.

## Order Guide

	Port Size	Bowl Type	Flow Capacity	Dimensions (inches)		
				Height*	Width	Depth
DE350-P02	¼"	Poly	10scfm	13.6	5.2	4.8
DE350-P04	½"	Poly	10 scfm	13.6	4.6	4.8
DE301-M04	½"	Metal	8 scfm	9.9	3.9	3.9
DE401-M04	½"	Metal	10 scfm	16.5	6.8	4.8

\*To add an indicator, add "I" to end of part number (Indicator adds about 1" to height)

The Order Guide:  
 Choose the right model for your application--  
 Narrow down your choices by:  
 Port size, bowl material (metal/polycarbonate),  
 drain style, or flow capacity (scfm).  
 Dimensions also included.

<b>ISO Class</b>	

For higher pressure applications, consult factory. Units equipped with differential pressure indicator have max temperature and pressure of 125 °F and 150 PSIG, regardless of bowl material.

Food Grade certified non-toxic powder coated filters meet requirements of 21 CFR 100. Coating ingredients meet at least one section of FDA Title 21, with the exception of food items containing 8% alcohol.

## Features & Benefits

- Unique, energy efficient cycling dryer reduces costs up to 80%
- Compact size for easy fit
- Automatic timer drain (with manual override)
- No gas expansion valve = no freezing up
- Low maintenance, long life design
- On/Off switch with multi-function display

## Specifications

- 20-2000 scfm, depending on model
- Port sizes: ¼" - 4"
- Maximum work: 230 PSIG
- Maximum temperature: 158 °F
- Maintains constant dew point: 38 °F

E8000	1"	18.0	30.0	5.0

## Specifications

For All DRAD units

- Requires 110 volt service
- Max inlet pressure 100 PSI on units up to 30 scfm, 150 PSI on larger dryers
- 1.0 to 0.01 micron filtration capacity
- 100 °F Inlet air temperature

### DRAD 4 to 30

- Compact Design
- (2) moving parts
- -40°F, -100°F dewpoints
- Flow rates from 4-30 scfm
- ISO Class 1 Dewpoint
- Complete packages which include: dryer, (2) stage pre-filter & after-filter

### DRAD 80 to 250

- Pilot Air Filter
- Separate drain & fill port
- Tower pressure gauge
- ASME code construction & stamped pressure vessels (6" diameter and larger)
- Front mounted control panel
- NEMA 4 Electrical enclosure on units over 30 scfm
- On/Off Switch
- Pre-piped & mounted pre-filter & after-filter
- Purge exhaust piston valve
- Non-lubricated inlet valve
- Structural Steel frame with floor stand
- Full charge of desiccant
- Safety pressure relief valve for each tank
- Fail safe design against power failure: bi-directional piston valve remains in the same position to ensure air-flow throughout dryer without interruption
- Field adjustable timer cycle: 4, 10, or 15 minutes
- High efficiency angle body piston purge valve
- Springload check valves
- Stainless steel inlet/outlet diffusers
- -40°F, -100°F dewpoints
- 250 PSI
- Filters mounted

## Order Guide

Model Number	Air Flow (scfm)	Air Connection (NPT)	Net Weight (lb)	Height (in)	Width (in)	Depth (in)

DRAD-250	250	1 1/2	1010	83.0	40.0	44.0

A prefilter and after-filter are recommended. Larger sizes available. Contact the factory for more info.

## Filters & Filter/Regulators

- Light weight acetal body with polyamide bowl
- Filter/Regulator with glass face chrome gauge
- Low pressure drop
- Semi-automatic drain with manual override
- Filter with adjustable 0-120 PSI regulator
- Can be wall mounted or panel nut mounted

## Lubricators

- Light weight acetal body with polyamide bowl
- Siphon tube filter provides clean lubricant downstream
- Adjustable oil feed with tamper-proofing capability
- Can be filled while under pressure

## Order Guide

Filter	Model Number*	Port Size (in)	Flow Capacity (scfm)	Maximum Supply Pressure (PSIG)	Maximum Operating Temp (°F)	Filter Capacity	Dimensions Height x Width x Depth (in)

+ To order without gauge, omit '-G' from the model number.

++ Stainless Steel Unit, NACE Compliant MR0175 STD, Low pressure drop, fluorocarbon diaphragm/seals.

+++ Also available in 1/8" NPT ports & non-relieving types. Call factory for options.

## Replacement Gauges

**PG-160**

2" Diameter Gauge,  
0-160 PSI  
1/8" Bottom Mount  
(E4000 Dryers)

**PG-030-15C**

1.5" Diameter Gauge,  
0-30 PSI  
1/8" Centered Back  
(MR Series)

**PG-060-1.5-CB**

1.5" Diameter Gauge,  
0-60 PSI  
1/8" Centered Back  
(MR Series)

**PG-160-1.5-CB**

1.5" Diameter Gauge,  
0-160 PSI  
1/8" Centered Back  
(MR & FR Piggyback Series)

**KSG-008**

2" Diameter Gauge,  
0-160 PSI  
1/4" Centered Back  
(HD Regulator Series)

## Heavy Duty: Regulators

- Rugged, heavy duty high-flow design
- All metal, corrosion-resistant anodized aluminum body
- Tee handle knob, relieving type regulator
- Chemically resistant Buna N diaphragm
- Gauge included with units (also available without gauge)
- Lockout valves available
- 1/4", 3/8", 1/2", 3/4", 1", 1 1/4", 1 1/2" NPT ports available
- Higher pressure units available--call factory.

Model Number (for unit with gauge+)	Flow Capacity (scfm)	Adjusting Range Pressure (PSIG)	Port Size (NPT)	Maximum Supply Pressure (PSIG)	Maximum Operating Temp (°F)	Weight (lbs)	Dimensions (inches) Diameter x Height

F1500HDMF	400	250	1 ½”	200	4.5	4.00 x 10.50

\*For model with manual drain, replace “F” with “P”. For model with optional sight glass, add “T” to end of model number.

## Lubricators

- Rugged, heavy duty high-flow design
- Anodized Aluminum housing
- Siphon tube filter provides clean lubricant downstream
- Twist-off easy bowl removal
- Adjustable oil feed w/ tamper-proofing capability
- Can be filled while under pressure
- ¼” through 1 ½” NPT ports available

Model Number	Flow	Maximum Supply Pressure (PSIG)	Port Size (NPT)	Maximum Operating Temp (°F)	Weight (lbs)	Dimensions (inches) Diameter x Height

L1250HDM	600	250	1 ¼”	200	4.5	4.00 x 11.62
L1500HDM	750	250	1 ½”	200	4.5	4.00 x 11.62

## Rotary Screw 5-100 HP

Units employ 100% duty cycle, eliminating overwork of the compressor.

Simple maintenance and once-a-year oil change make this series a perfect fit for body shops and many other applications.

- Available 5-100 HP
- Operating pressures from 100-180 PSI
- Low speed rotors on air end for long life
- Less than 3 ppm oil carry over
- (1) solenoid valve operates machine
- Quiet operation
- Spin on separator & oil filter
- Oil after-cooler on all models
- 8000 hour full synthetic oil standard
- 125, 150, 175 operating pressure at no extra charge
- Analog controls-- No unnecessary/unreliable microprocessor
- 5 year extended warranty available for air end
- German air end components

Single phase, vertical, and enclosed configurations available. Please contact factory for full product line.

Screw

Piston

## Piston 5-15 HP

The Industrial Series compressors are designed for heavy duty automotive and industrial applications.

CA2 pumps are manufactured for durability and run at low RPM to provide reliable air for your application.

- Solid cast-iron pump
- Disc and spring valves
- Centrifugal unloader
- Low pump rpm
- Oil sight glass
- Oil drain and fill on front of compressor pump
- Heavy duty NEMA motors
- OSHA style totally enclosed belt guard
- ASME code receivers
- Needle bearings

**BRAD-BD1**

**includes:**

Prefilter, Final Filter, CO Monitor, Heavy Duty Regulator with 0-160 PSI Gauge, MR-1 Mini Regulator

**BRAD-CM3**  
CO Monitor

- Monitors Grade “D” Breathable Air
- Ultra lightweight design
- Activated carbon pre-filter for hydrocarbon removal to 0.003 ppm
- 0.01 micron final filter—fine particulate & oil removal at 99.9998%
- Dual ½” outlets with ¼” high flow, quick disconnects provided
- Rated for up to 60 scfm
- Heavy duty, high flow regulator assembled with FDA lubricant
- 0-60 PSIG mini-regulator controls air pressure to monitor
- Low purge loss through monitor
- 110 Volt AC Electrical
- 1-2 operators
- Easy Install: Assembly is mounted on a ¾” board

optional MAG11 drain

**RT-FMR-1**

Display Kit, 12"x18"  
1/4" & 1/2" Filter-Regulator  
and Mini Regulator  
Comes with mounting hardware

The **RT-FMR-1** is the perfect visual for our filter-regulators. Efficient sales tool with informational text & order info on a heavy duty laminate poster for mounting to peg board. Comes with product images printed on the board should you sell your display model—convenient while waiting for replacement stock.

**Features:**

- RT-FR250-G**
- RT-FR500-G**
- MR1120-02G**

\* Consult factory for additional filter units available with stand.

## Mounting Brackets

**GPA-95-016**  
20 scfm only  
Wall Mounted

Example  
3P-020-M02-Fi  
mounted with  
GPA-95-016

**N34-95-969**  
20 scfm only  
(Can be used to connect  
combo unit modularly)

Example  
3P-020-M02-Fi  
mounted with  
N34-95-969

**BK-1**  
60 SCFM Only  
Wall Mounted  
(Combo units require two)

**PB-004**  
½" Models Only  
Supports units on pipe  
(Units can still rotate)

**N32-95-734**  
Universal  
¼" - 1" Units  
¼" x ½" slots  
on 1½" centers

## Differential Pressure Indicator

**N32-W1-DPI**  
Differential pressure indicator  
(used on most models ¼" - 2" NPT)

**N32-95-020**  
Blanking cap  
(To replace indicator)

## High Flow Couplers & Plugs

Easy Assembly/Disassembly • High Quality Brass Construction • High Pressure Applications • ¼ NPT Male or Female Connections

**HFFC-1**

**HFFP-1**

**HFMC-1**

**HFMP-1**

Compatible with  
our PH35C  
Conductive hoses.

3P-060 + 3C-060

# RTi-QAT Kit: Quality Air Tester

**In just a few minutes, you could save thousands of dollars by identifying the 3 major causes of refinish problems:**

- Inadequate compressed air supply
- Compressed air humidity
- Particulate contamination

**Accurately test the quality of the air in compressed air lines, filters, hoses and related equipment. Clean dry air, free from humidity, oil, and particulate contamination is essential for many professional applications.**

**Our kit checks critical aspects of your paint air, at the point of use & throughout the entire facility:**

- Static air pressure
- Dynamic air pressure
- Air Dew Point
- Air Contamination
- Air Temperature
- Relative Humidity

**RTi-QAT**

## Excellent Sales Tool

Requires some initial training for use (recommended)

## Excellent Maintenance Tool

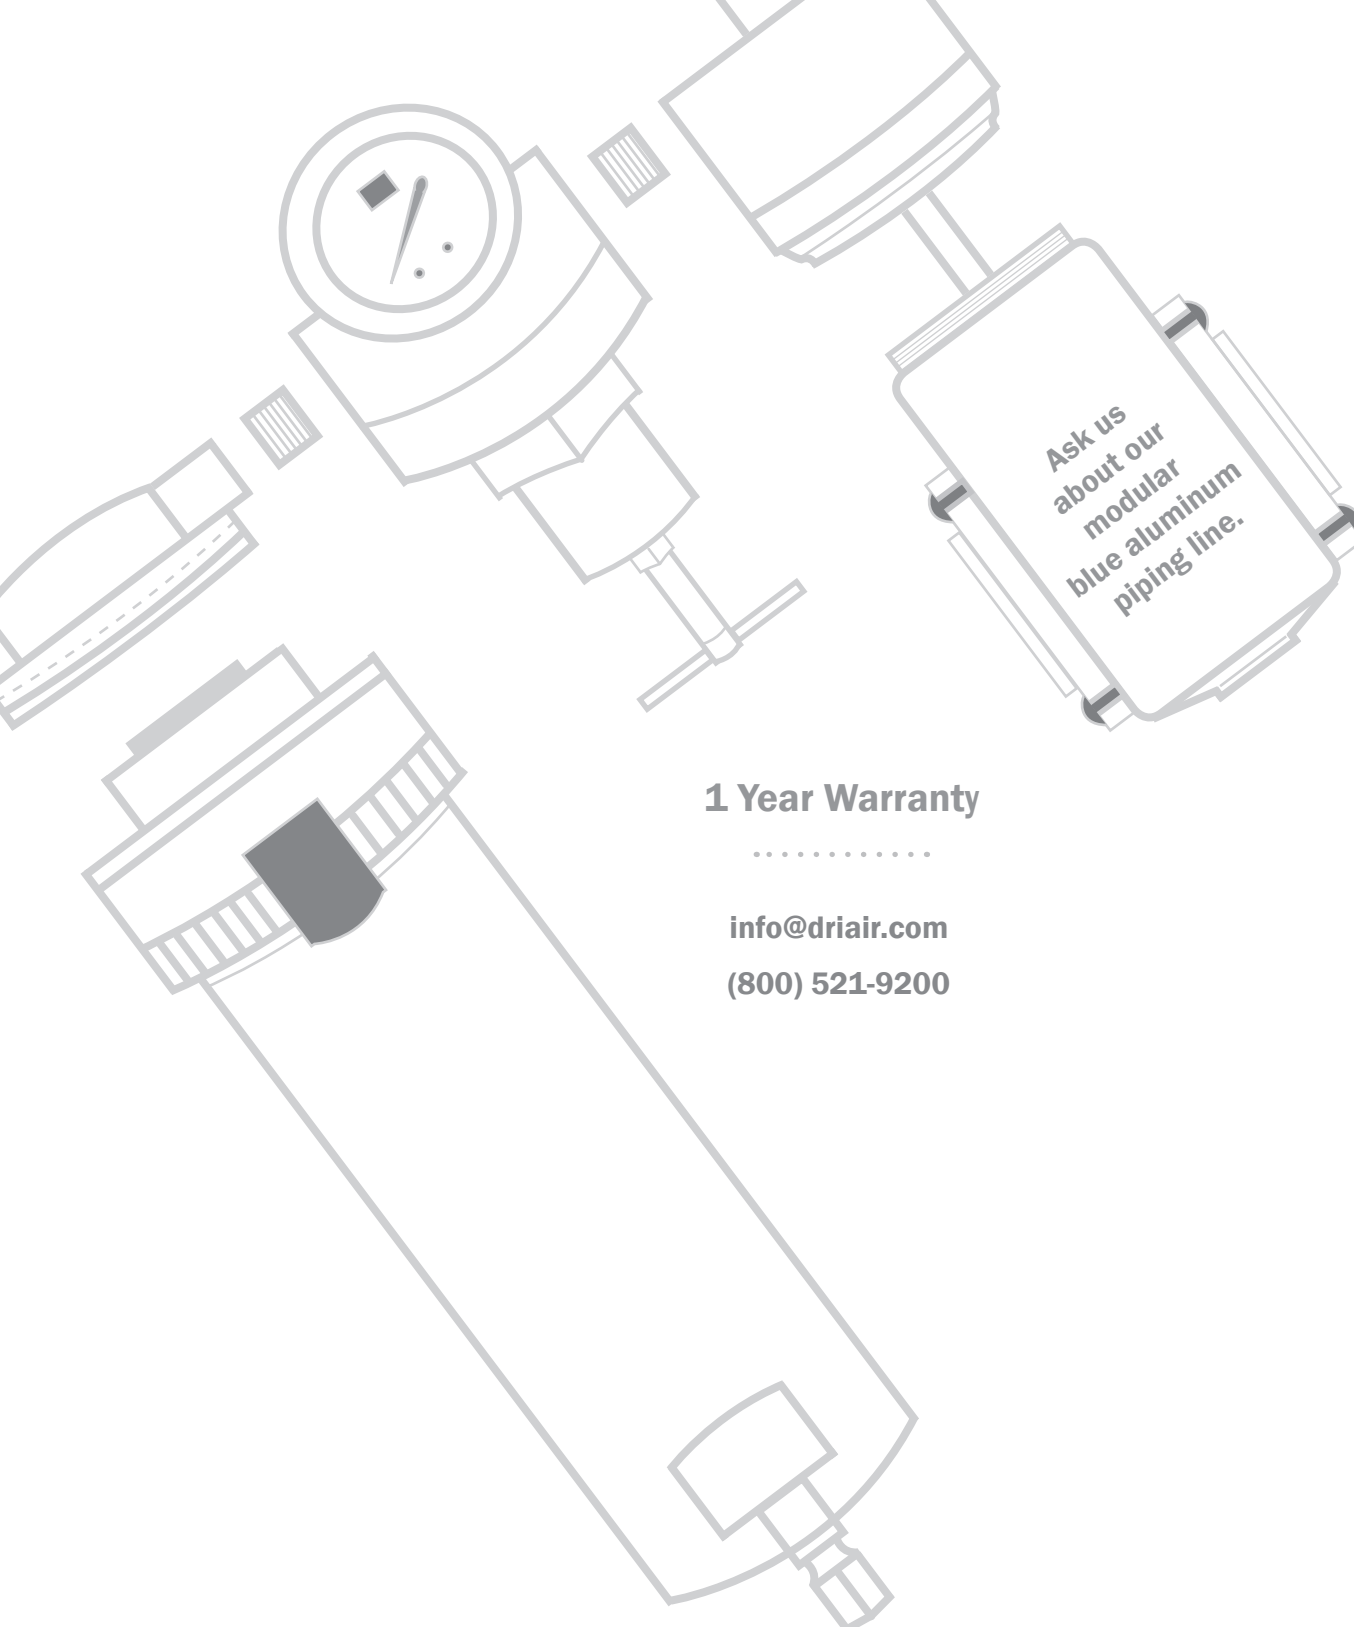

### Kit contains:

- Contaminant Checker  
Sampler vessel with contaminant capturing membrane disc, & magnifying lens with integral light source
- RH Humidity Checker, 0-100% Range  
Measures compressed air temperature & dew point.  
(Paint MFR's now specify 10% RH or lower)

**RTI** takes pride  
in giving our customers  
an **excellent**  
**customer service experience.**

From the employees  
in the corporate office  
to our regional sales managers,  
we strive to meet  
all of our customer's needs.

**We are not limited**  
to "standard" products.  
If you do not see  
what your customer needs, **ask us.**  
We can custom engineer  
a product or system that will exceed  
your needs and expectations.

**Support**  
for our product lines  
does not end after the ship date.  
Our Regional Sales Managers & Technical Support  
are available each business day.

**Because your business matters.**
